## BIOGRAPHY

---

Adam von Dolle lives and works between South Florida and New York City with an artistic practice focused on the full spectrum of media and format, from installation and sculpture to the 2-dimensional, blurring the lines between interior design and conceptual art. At the core of Adam von Dolle's practice is the fundamental mission to promote change through creation. Each piece he creates is a reaction or a call to action in response to the events and histories that shape our society, spanning each painfully recent instance of gun violence to the problematic and precarious foundations upon which American life exists today.

von Dolle originally trained as an interior designer after studying for twelve years in a Catholic seminary and monastery. He received his Masters of Science in Interior Design from Pratt Institute in 1983 before working with I.M. Pei and Partners, becoming the Vice President of Interior Design at Welton Becket and eventually creating his own design business, Adam Dolle Incorporated. He founded Adam Dolle Studio in 2018 to channel the resources and cross-disciplinary methodology he developed within his design career into a newly invigorated art career, producing a wide body of work while creating an environment of collaboration within the local art community. von Dolle's work has been exhibited throughout South Florida in solo exhibitions including 2019's *Flower in the Gun* at 13<sup>th</sup> Street Studio, Fort Lauderdale and *A Question of Morals* at Studio 1608, West Palm Beach in addition to group shows like *Biblio* at Palm Beach Modern & Contemporary, *Unleashed Art Fair* at Box Gallery and SMS: *Semantic Textiles* at Bailey Contemporary Arts, Pompano.
